ABOUT THIS MAP

Conservation lands were derived from the 2009 NH GRANIT database as downloaded from www.nhgranit.org on 6-2-09. Core habitat areas as shown in red are derived from field observations of WAP-listed species of greatest conservation concern. Best habitat areas were derived from field data, documented occurrences of rare species and their habitats, as well as a careful analysis of the 2006 1-ft color aerial photographs, courtesy of Complex Systems Research Center, Durham, NH.
